The Research / Data Lifecycle

zotero

Citation management software - Free

<https://www.zotero.org/>

The screenshot displays the Zotero application window. The left sidebar shows a library tree with 'My Library' expanded, containing folders like 'Book Reviews', 'Colonial Medicine', 'Dissertation', 'Science and Empire', 'Teaching', 'Mapping', 'Open Access', 'Text Mining', 'Visualization', 'My Publications', 'Duplicate Items', and 'Trash'. Below this are 'Group Libraries' and a 'To Read' list. The central pane shows a list of items with columns for Title, Creator, and Year. The item 'Circulation of Medicine in the Early Modern Atlantic World' by Cook and Walker (2013) is selected. The right-hand pane shows the details for this item, including its type (Journal Article), title, author (Cook, Harold J.), abstract, publication (Social History of Medicine), volume (26), issue (3), pages (337-351), date (2013/08/01), series (Soc Hist Med), language (en), DOI (10.1093/shm/hkt013), ISSN (0951-631X), short title, URL, accessed date (1/24/2018, 10:17:12 AM), location in archive, library catalog, call number, rights, extra, date added (1/24/2018, 10:17:12 AM), and modified date (1/24/2018, 11:50:15 AM).

OpenRefine

Data cleaning, reconciliation - Free, open source

<https://openrefine.org/>

Cluster & edit column "Place"

This feature helps you find groups of different cell values that might be alternative representations of the same thing. For example, the two strings "New York" and "new york" are very likely to refer to the same concept and just have capitalization differences, and "Gödel" and "Godel" probably refer to the same person. Recent studies demonstrated that the reproducibility of previously published computational experiments is inadequate. Many of these published computational experiments are not reproducible, because they never recorded or preserved their computational environment. This environment consists of artifacts such as packages installed in the language, libraries installed on the host system, file names, and directory hierarchy. Researchers have created reproducibility tools to help mitigate this problem, but they do nothing for the experiments that already exist in online repositories. This situation is not improving, as researchers continue to publish results every year without using reproducibility tools, likely due to benign neglect as it is common to believe publishing the code and data is sufficient for reproducibility. To clarify the gap between what existing reproducibility tools are capable of and this issue with published experiments, we define a framework to distinguish between actions taken by a researcher to facilitate reproducibility in the presence of a computational environment and actions taken by a researcher to enable reproduction of an experiment when that environment has been lost. The difference between these approaches in reproducibility lies in the availability of a computational environment. Researchers that provide access to the original computational environment perform proactive reproducibility, while those who do not enable only retroactive reproducibility. We present Reproducibility as a Service (RaaS), which is, to our knowledge, the first reproducibility tool explicitly designed to facilitate retroactive reproducibility. We demonstrate how RaaS can fix many of the common errors found in R scripts on Harvard's Dataverse and preserve the recreated computational environment.

iii

Lay Summary

One of the pillars of modern science is computation. Research software allows scientists to quickly and accurately analyze large amounts of data. When scientists publish their results, it is critical that their peers can then repeat their computations.

Unfortunately, researchers have discovered they cannot reproduce the findings of openly published analyses. This failure is not necessarily due to an incorrect experiment or flawed science. Instead, the software that scientists use to analyze their data fails if the original authors do not take careful steps ahead of time to preserve it. Researchers created new technologies to help facilitate this preservation, but they are not (yet) commonly used. We created a new tool, Reproducibility as a Service, that helps facilitate reproducibility for publicly available analyses that lack this preservation.

Pharmacy Daily

Monday 14th Apr 2025

Today's issue of PD Pharmacy Daily today features four pages of news, plus full pages from:

- Dermal Therapy
- Glucocel

Scar treatment
Dermal Therapy has a scar management range for new and pre-existing scars. Formulated with silicone, the gel and patches can visibly fade scars, softening and flattening them. More details on page five.

Glucocel Glucocel
GLUCOCEL is running a competition to win your

PDL Professional Officer vacancy
PharmaCEUTiCal Defence Limited (PDL) is seeking a Professional Officer to provide member support and advice in the event of a medication error, and risk management advisory services for the pharmacy profession. The successful applicant will ideally have current or recent experience in community and/or hospital pharmacy. While member support is the primary focus of the role, experience in representative, educational, or risk management fields would be considered an advantage. As the role also involves developing and presenting risk management advice across

Cal-600
Helps build strong bones
Available from APi, Suncoast, Rouse & Co.

CWH Pharmacy of the Year
Chemist Warehouse has been awarded Chemist Pharmacy of the Year in the 2024 Roy Morgan Customer Satisfaction Awards. This is the fourth time the powerhouse pharmacy retailer has taken out the prestigious award, with Mario Tascone (pictured), Chief Operating Officer and Executive Director Retail accepting the award at a ceremony last week on behalf of Chemist Warehouse. Roy Morgan is Australia's largest independent research company, with customer satisfaction ratings collected from the Roy Morgan Single Source survey of approximately 60,000 Australians each year. The winner for the calendar year is the organisation that has achieved the most months
